Periodically based Questionnaire

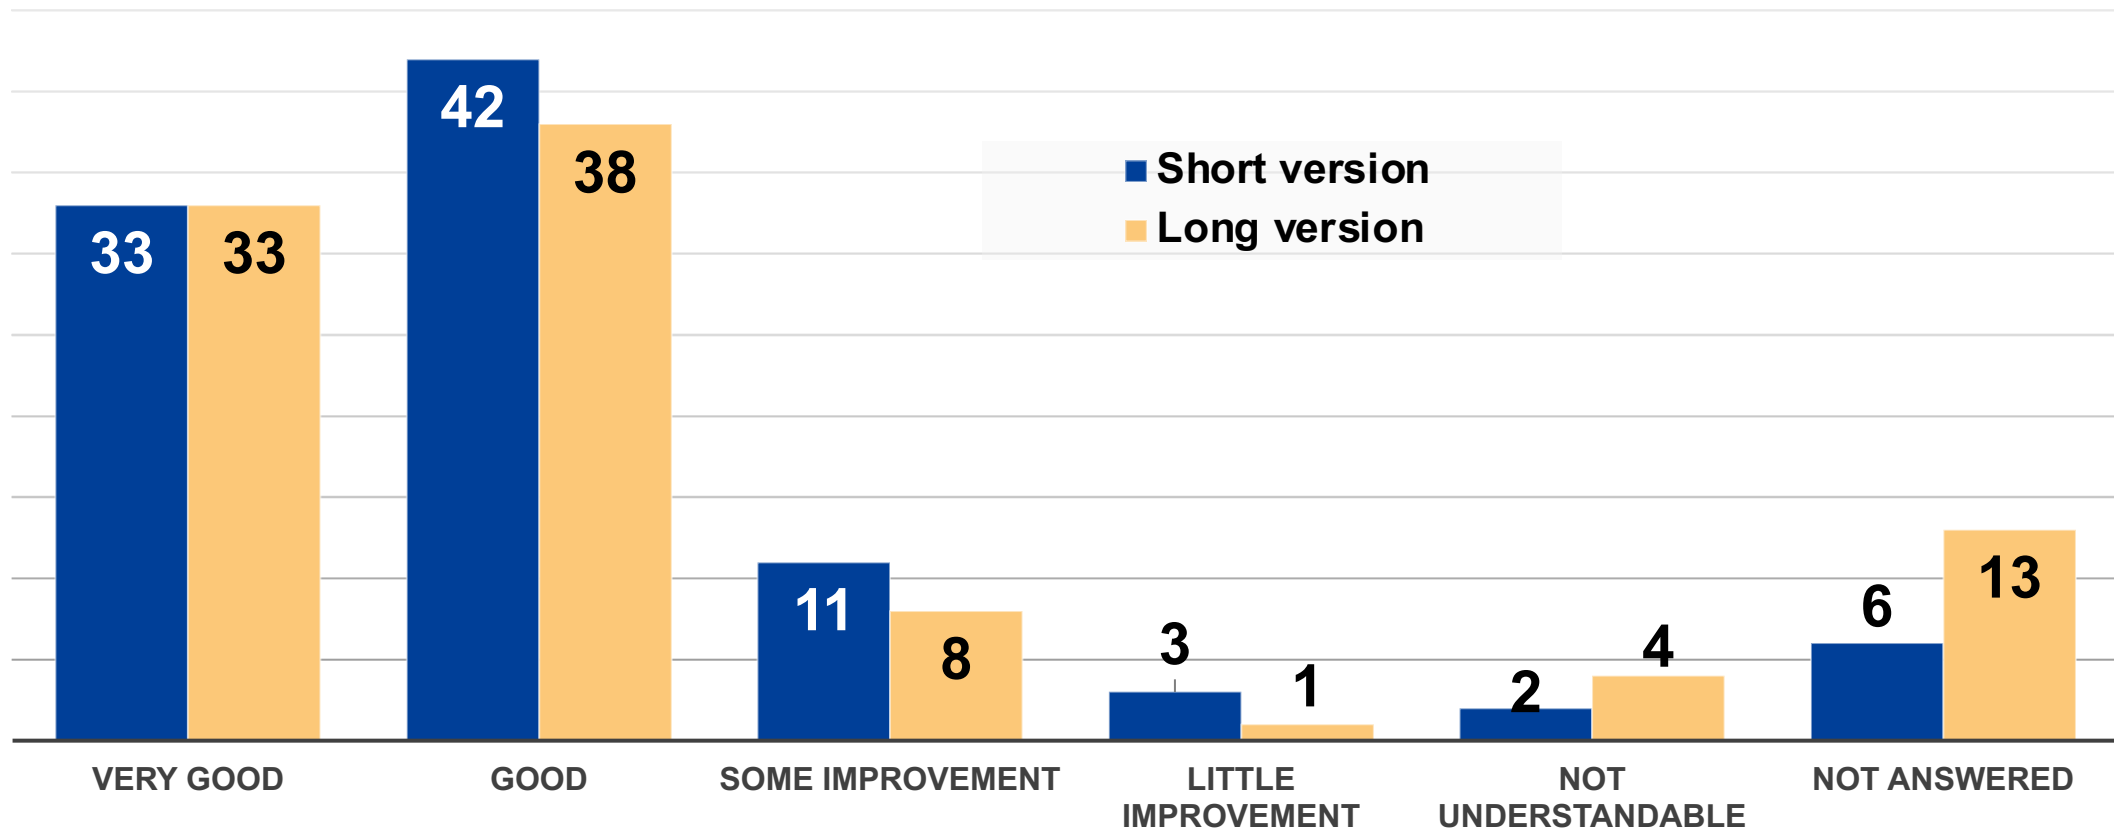

Are the chapters of diagnoses clearly written?

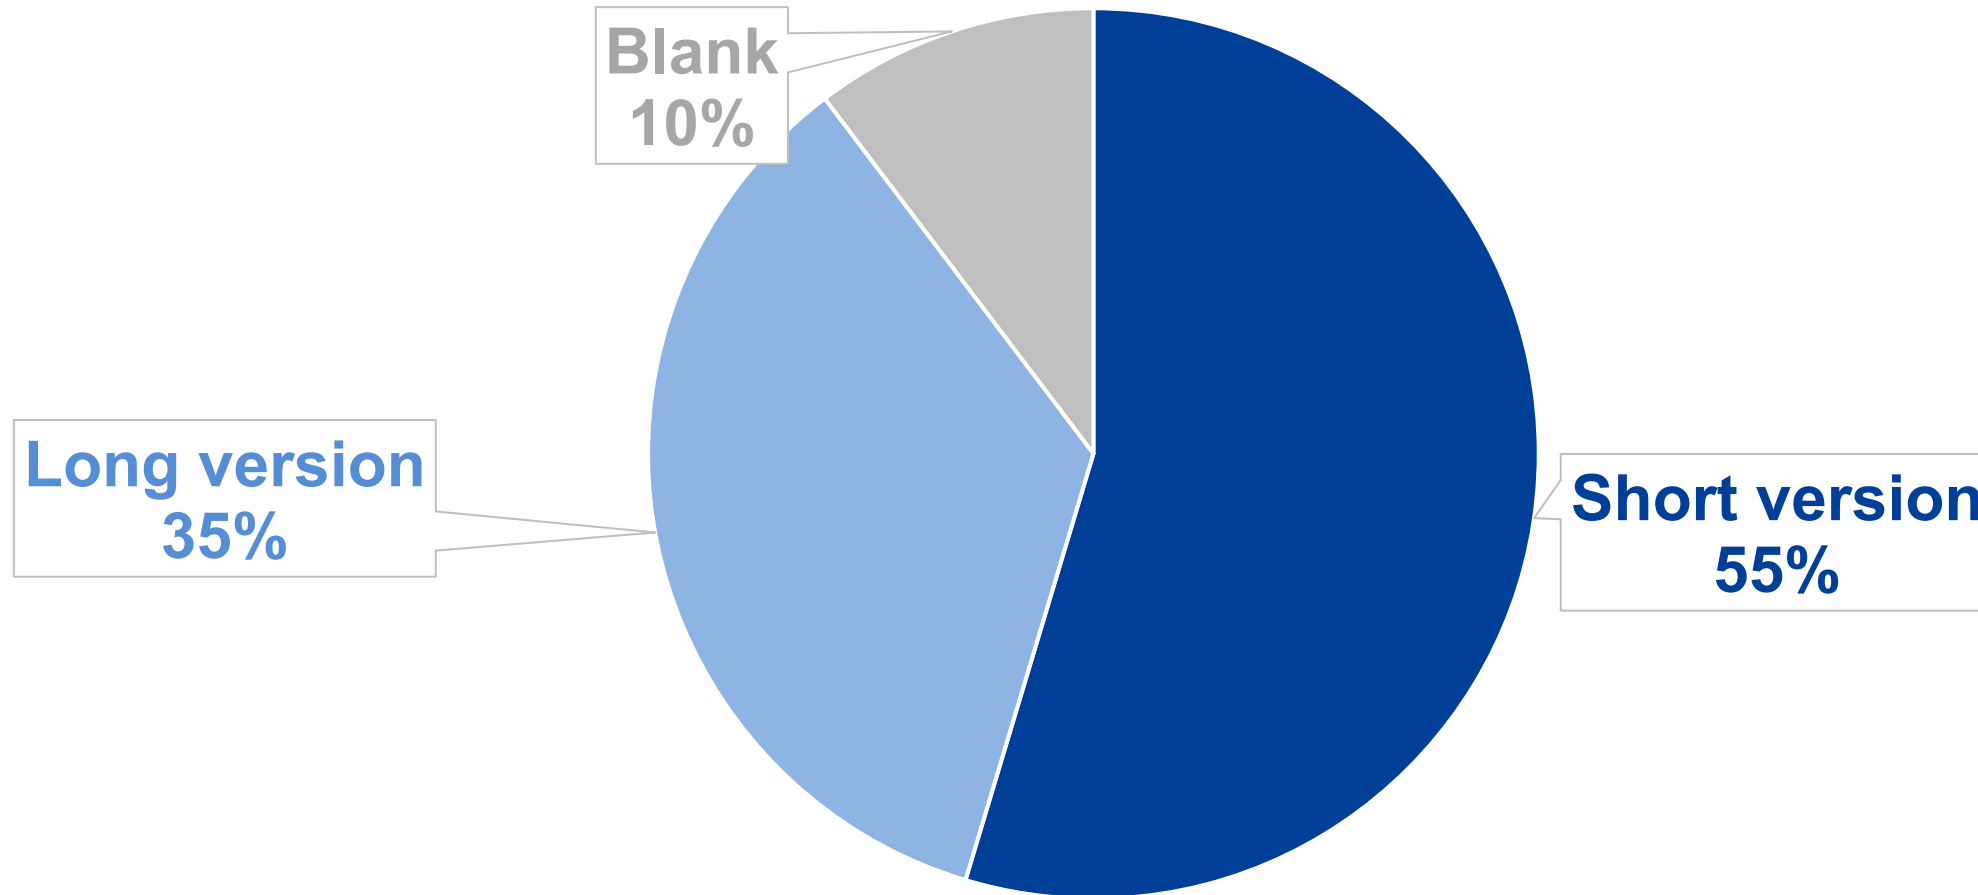

Are definition, epidemiology, pathogenesis, clinical picture, differential diagnoses, general therapeutic considerations of the disease easy to understand?

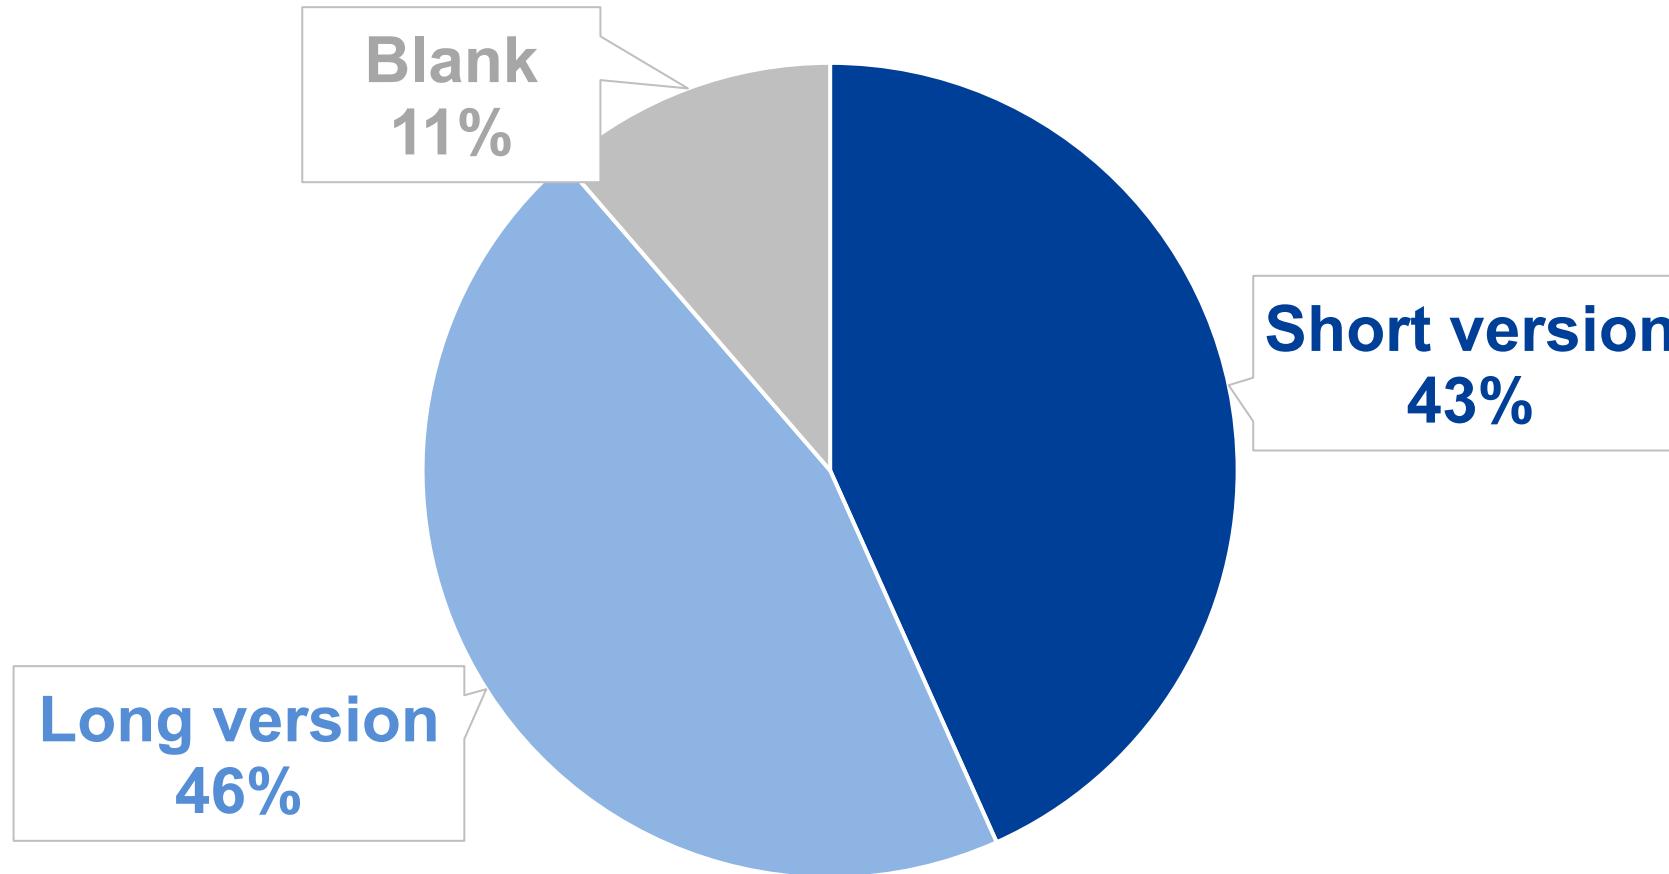

When you compare the written text and the functionality of the implemented text on the website for the efficacious learning of the topic, do you think you learn better than compared with standard text books?

Would you prefer the long or the short version for preparing for the clausura after the end of the semester?

Would you prefer the long or the short version for preparing final exam?

Which of the two versions short or long did you prefer during the semester when learning Dermato-Venereology?
